Key knowledge – What is the difference between a man-made object and a natural object?

Natural objects are something that occurs naturally.

Man made objects are something that was made by humans.

Key knowledge – What is the difference between a solid, liquid and a gas?

Solid – a material that keep its own shape.

Liquid – can take on the shape of any container it is poured into.

Gas – air like substances that can move around freely and do not have a shape either.
