key	to interpret the code into a user friendly name that is easier to recognize e.g. colour or name
brackets	the part of the code where the user friendly information is stored and shown

Key knowledge – Python – what is it?

Python is a high-level general purpose programming language. It uses a text-based syntax (arrangement of words and phrases).

```

1 #!/bin/python3
2
3 born = input ('What year were you born?')
4 born = int (born)
5 print(2025 - born)
6

```

Key knowledge – digital footprint

Any information that is connected to you, can show up as your digital footprint. For example, if an employer or university searches for you, they will also be able to see information that you have been tagged in or associated with.
