Key knowledge – physical and human features

Key knowledge – maps, land use and navigation with a compass

A compass can be used to navigate to specific places on a map.

We use compass points to describe position and direction. There are 8 points on a compass.

We can use a compass to explore our local area. We might give somebody directions using compass points to get to a specific place in our local area.

Maps are updated regularly. Old maps show how the local area has changed over time.

Land is used for many reasons; recreation, residential, leisure and commercial. Within our communities land is used for a variety of different types of housing.
